

DINAMAP ProCare

Vital Signs Monitor

imagination at work

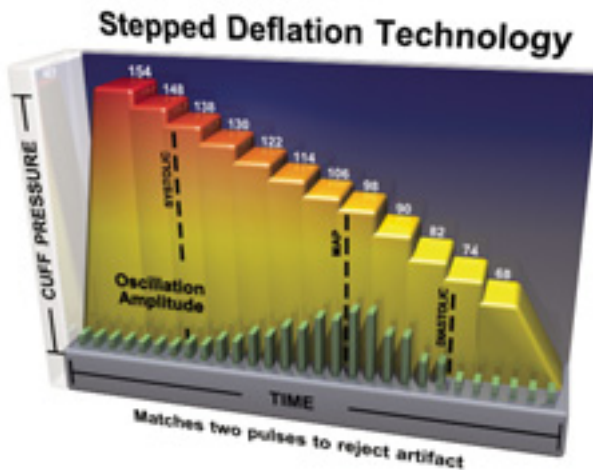

More vital signs, less dollar signs.

More than 3 million times every single day critical patient care decisions are made based on blood pressure determinations using DINAMAP® technology. Now this technology is available for vital signs in a durable, easy-to-use unit that fits even the most sensitive budgets.

With the DINAMAP ProCare Series, you can take BP measurements that are fast, accurate and comfortable. Get reliable temperature readings in seconds. And get oxygen saturation readings with your choice of leading SpO₂ technologies. Which means you spend less time checking vitals and more time on actual patient care.

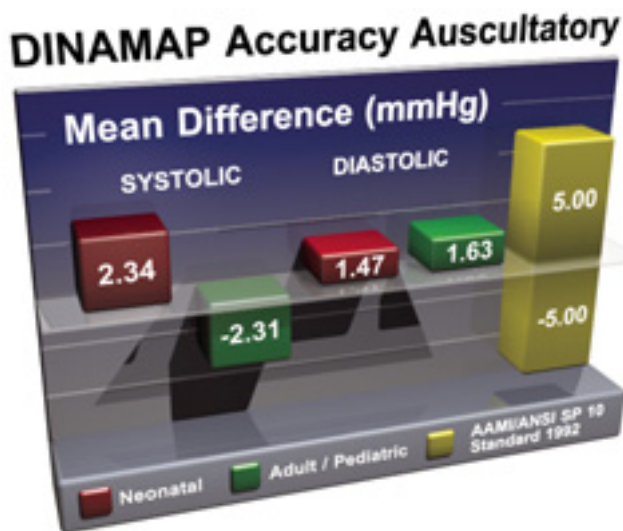

Gold standards at market prices.

When choosing standards for vital signs, choose gold standards. DINAMAP ProCare is the only vital signs monitor on the market that can provide the following lineup of fast, accurate algorithms.

DINAMAP non-invasive blood pressure

With more than 25 years and over 350,000 devices, DINAMAP has earned a reputation as the gold standard in non-invasive blood pressure measurement. Patented DINAMAP technology actively rejects artifact to ensure exceptionally accurate BP readings even in hypertensive and hypotensive cases, regardless of patient movement.

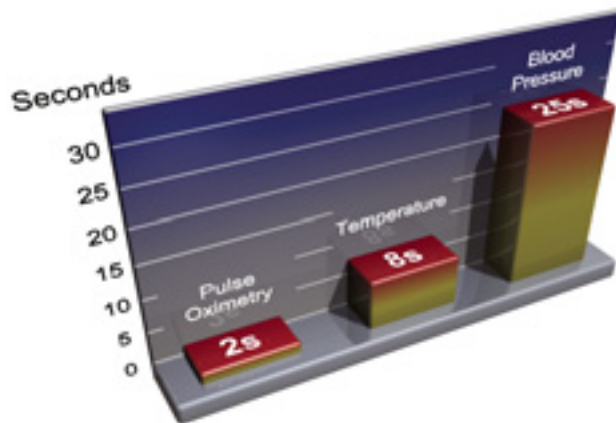

IVAC® Turbo•Temp

An electronic thermometry system by Alaris Medical Systems, Turbo•Temp is not only extremely accurate, but also very fast. Oral temperatures are provided in approximately 7 seconds, saving you time and increasing patient comfort.

Masimo SET® (Gold Standard) or Nellcor OxiMax™

DINAMAP ProCare monitors support market leading oximetry technologies including gold standard Masimo SET® as well as Nellcor OxiMax™, so you can meet your high standard of care with one monitor series.

Easy to use – by the numbers.

1. Apply the Critikon® blood pressure cuff
2. Place the SpO₂ probe
3. Insert the temp probe
4. Press one button and DINAMAP ProCare zooms through vitals

DINAMAP ProCare also features large, bright LED displays that are visible from around the room. It can even take timed, repeated readings on one patient automatically! You'll find DINAMAP ProCare simple to operate, with no extensive training required.

Designed for your demanding environment.

DINAMAP ProCare has been engineered to provide years of trouble-free service. In addition to incorporating the highest-quality materials for hospital grade durability, the monitors also are designed to be low maintenance and easy to repair.

Durability has been increased with a simpler design, for example: only one board-to-board connection, long-lasting elastomer buttons, durable LEDs and industrial grade, impact resistant plastics. Internal components are placed in field replaceable units for easy swap-out if needed.

DINAMAP ProCare is designed to stand up to rigorous use and keep you on budget.

30"

Drop tested to heights of 30" to ensure durability

For more than 100 years, scientists and industry leaders have relied on General Electric for technology, services and productivity solutions.

So no matter what challenges your healthcare system faces – you can always count on GE to help deliver the highest quality services and support.
