

GT-20 Transport Patient Monitor

Serves as both a transport monitor and a multi-parameter module for elite Series, GT-20 provides a comprehensive and seamless monitoring solution both inside and outside hospital, connecting ambulatory cares to intensive cares.

Weighing less than 1.5kg with battery installed, GT-20 is one of lightest transport monitor you can find on the market. Engineered strictly as to IP44 waterproof and dust proof standard, as well as a solid shock resistance performance, GT-20 is suitable for patient transport in the harshest environments.

With its excellent power saving performance, GT-20 requires no fan for heat expiration while the battery life is also extended for long term transport even without external power supply. In the meantime, the large non-fading built-in memory helps store the monitoring data during the whole transport session.

Though small and compact, GT-20 does not only support basic parameters but also 2-channel IBP, expanding its usage for various medical cases.

The modern full-touch operation without physical buttons is unique on this kind of transport monitors, bringing user experience to a brand new level.

Unlike other conventional transport monitors on the market, GT-20 comes with a built-on handle which does not need to be removed even when plugging into elite Series. On plug-and-play, GT-20 switches role easily between a module and a monitor, connecting data together among different applications.
