

ARGUS PRO SL

Monitoring in a new dimension

With the ARGUS PRO SL, the term „compact monitor“ now also applies to the 17“ class.

Target group:

- Intensive care unit
- Operating theatre
- Recovery room
- Ambulatories with invasive diagnostic equipment

Operative range:

- Patient monitoring in the intensive care unit and the operating theatre

Unit performance:

The ARGUS PRO SL provides a clear overview of all patient data on a 17“ touch screen.

Being part of the ARGUS PRO System, the ARGUS PRO SL can display the data of any other ARGUS PRO monitor within the clinic network.

The ARGUS PRO SL ranks among the highest capacity intensive care monitoring systems of today. Its intuitive user interface, which is operated via touch screen, provides direct access to all important settings of the shown parameters. An unlimited number of display configurations can be saved so you can adapt the display to the needs of any monitoring situation.

The ARGUS PRO SL can be integrated with your patient data management and hospital information systems to allow space-saving and cost-effective data exchange. An optional software allows the display of X-ray photographs on-screen.
