VECTORSURGE Accessories

Accessories (supplied)

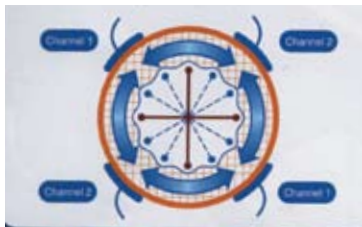

Accessories (optional)

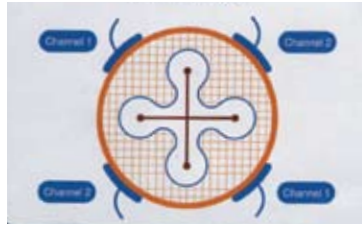

METTROLLEYT7270

Vectorsurge

Automatically rotates vector 200 times per second ensuring efficient therapeutic benefits.

Static Field

Other stimulators using the common static field leave areas of tissue not treated.

VECTORSURGE SPECIFICATIONS

Auto Vector 200

- Automatically rotates vector 200 times per second ensuring therapeutic benefits

Dial-&-Set

- One control knob selects all the parameters to be easily programmed

Preferred Preset

- The "Dial-&-Set" treatment parameters can be stored and started by simply pressing the start button to start treatment

Surge Control

- Precise control over the surge mode with rise, fall, on and off times - all independently programmable for optimum contraction techniques.

Manual Balance Control

- For balancing Interferential and Premodulated applications for maximum patient comfort and therapy benefit

Lead-Off detector

- An audible alarm will sound if a lead loses contact with the treatment area

Compatibility

- Easily combines with any Accusonic single or twin frequency for combined therapy
- Complies with Medical Device Directive (CE)
