

CARDIOTECH GT-1200

FETAL MONITOR

The GT-1200 Fetal Monitor is an amazing Fetal Monitor designed to check your patients' fetal health. The GT-1200 Fetal Monitor is perfect for clinics or midwives who want to monitor several patients at a time. You can store information on up to 150 patients at once. The GT-1200 Fetal Monitor can be used either notebook style or wall mounted, making it adapt to your needs.

It features a seven inch wide TFT color LCD display, fetal heart sound play and record, and a rotating screen. The GT-1200 Fetal Monitor also supports multiple languages, has a built-in quick-guide (LCD type only), a waterproof probe and is GE/Philips paper compatible.

Standard Accessories include two ultrasound Doppler probes and holders, an event marker jack, power adapter and cord, three probe belts, a UC probe, two packs of printer paper, one bottle of ultrasound gel, and an operations manual.

The GT-1200 Fetal Monitor also has Doppler sound, Information sound, and an alarm sound.

The optional PC-Interface (Central monitoring system) allows you to remotely control up to eight monitors, fetal heart sound record and play, unlimited multi-language support, wire (RS-232C) and wireless (Bluetooth) connection, network systems by LAN connection and remote real-time picking-up fetal heart sound.

The GT-1200 Fetal Monitor comes with a 2 year warranty (accessories excluded) and would be a great addition to any clinic!
