

## Company Profile

Since its establishment, SonoScape has been committed to providing high quality medical equipment for the healthcare sector. SonoScape specialized in the development and production of diagnostic solutions. Through innovation SonoScape continues to not only improve the efficiency and accuracy of healthcare solutions, but also to increase a sense of comfort for the patient and clinician. Since 2002, the innovative technology of SonoScape has benefited millions of people and we are dedicated to continue providing more effective and accessible healthcare solutions to the world.

## Quote from Frost & Sullivan

"The Frost & Sullivan Award for Growth Leadership is presented to the company that has demonstrated excellence in capturing the highest annual compound growth rate for the last 3 years... The sales of ultrasound devices contribute an overwhelming proportion of total revenue, helping the company strengthen its leading position to outperform the competitors in the marketplace. With increasing penetration of mid-to high-end ultrasound devices, SonoScape is expected to see growth potential in the future... "

## Company Milestone

- 2002: Company Founded in Shenzhen, China
- 2003: Released SSI-1000: the 1<sup>st</sup> 15" Portable Color Doppler system in China
- 2004: Released SSI-2000: the 1<sup>st</sup> PC platform Color Doppler system in China
- 2005: Received the "High Technology Company" award from the PRC government
- 2007: Received "CHINA TOP BRAND" award in the Medical Equipment Industry
- 2007: Released the 1<sup>st</sup> Real time 4D ultrasound system in China
- 2008: Received "European Entrepreneurial Company 2008" award from FROST & SULLIVAN
- 2008: Received "Flagship Company" award in the Medical Equipment Industry in China
- 2009: Received "Product Quality Leadership Award 2009" from FROST & SULLIVAN
- 2011: Received the Reddot 2011 Product Design Award for S20 in Essen, Germany
- 2013: Received "Ultrasound Market Growth Leadership Award, 2013" from FROST & SULLIVAN
- 2014: Received the iF product design award 2014 for S9 in Munich, Germany
- 2014: Received "Company of the Year in Ultrasound Market, 2014" From FOST & SULLIVAN

## S9

Feel the Difference

U-S920150402

Caring for Life through Innovation

Since releasing its first portable color Doppler ultrasound system, SonoScape has dedicated itself to the ultrasound field. From this dedication, a great deal of ultrasound technologies, especially in hand-carried systems have emerged. From this dedication, the S9 was released as a powerful and versatile imaging platform with a futuristic design. Compact, yet featuring comprehensive applications for cardiology, radiology, abdomen, obstetrics, gynecology, small parts and urology, S9 provides the best solution for ultrasound imaging through outstanding performance.

## A Multi-function Power Platform with Innovation

The S9 is embedded with SonoScape's core imaging technologies, which significantly elevates the imaging quality to a new level and reveals more diagnostic information for the clinician. Working with the S9, you can see more clearly, diagnose more confidently and work more comfortably.

### Spatial Compound Imaging

Spatial Compound Imaging utilizes several lines of sight for optimal contrast resolution, speckle reduction and border detection, with which the S9 is ideal for superficial and abdominal imaging for better clarity and improved continuity of structures.

### Pulse Inversion Harmonic Imaging

The harmonic signals are fully preserved without degradation of the acoustic information, which makes it possible for the S9 to image high-level details and improve contrast resolution by reducing noise and clutter in the visualization of subtle lesions, small parts, vascular and so on.

### C-Xlasto elastography

SonoScape provides the S9 with a new method to support the physician in assessing tissue elasticity. The differences in tissue responses are detected and visualized in real-time by the elastography algorithms through different graphical representations which can be particularly helpful in analyzing breast, thyroid and musculoskeletal structures.

### Stress Echo

Stress echo is the combination of 2D echocardiography with a physical or pharmacological stress, which can determine how the heart muscles respond to stress and is mainly used to diagnose and evaluate coronary artery disease. The S9's stress echo package, comes with a fully integrated and easily programmable interface that can be customized to fit your needs, all for the purpose of delivering a streamlined workflow for wall motion scoring and reporting.

### Real-time 3D (4D)

With increased physical channels and a new platform, the S9 offers both high quality imaging and high frame rates to meet a new standard of SonoScape's S series. Thanks to high frame rate and advanced technologies, the 4D imaging of S9 delivers smooth movement of the fetus and offers comprehensive 4D acquisition, data rendering, and post-processing functionality.

### High Density Probe

S9 is equipped with a high density phased array probe to meet the needs of both high frame rate and premium resolution in cardiac imaging. Thanks to the high sensitivity of SonoScape's color Doppler mapping, the S9 can provide an accurate cardiac diagnosis beyond your imagination.

# Smart

## Perform Your Operation, Feel the Difference

SonoScape aims to design medical equipment that has incorporated state-of-art technologies combined with optimal workflow. The full-sized touch screen of the S9 surpasses the hardware limitations of the traditional keyboard, increasing the possibility of an easier operation.

Using the S9, you will experience faster operations on a variety of applications, including the most difficult of diagnostic tasks. View these programs below, and be inspired to boost your productivity.

### Intuitive Graphic Icon

Guides operators in the exam mode with a single touch

### Convenient Adjustment

All parameters can be easily adjusted by pressing the smart touch screen

### Virtual Alphabet Keyboard

Ensures patient information and doctor comments can be inputted easily

### Specific Application Packages

Measurement items, body marks and annotations are classified in terms of different applications

Take Your Premium Performance Anywhere

SonoScape's S9 offers the highest standard of ergonomics and delivers to you the latest technological innovations with highly-integrated chip sets, which enables excellent portability and flexibility. Incorporated with an intelligent and style-changeable smart touch screen, the S9 has set a new standard for ultrasound scanning, which will bring you unprecedented ease-of-use.

50° Foldable 15" LCD Display  
Graphical User Interface Touch Screen

140° Opening Angle  
Abundant Connection Interface
