End Tidal Carbon Dioxide Monitoring

EDAN G2 CO2 (Sidestream)

- Superior water trap design for accurate monitoring
- iCARBTM algorithm with intelligent CO2 pseudo wave identification technology
- Multiple sampling accessories as options

Respironics CO2 (Mainstream/Sidestream)

- Plug & play
- Dehumidification tube instead of water trap design
- No need to calibrate on a regular basis
- Low sampling rate of 50ml/min

MASIMO Anesthetic Gas/O2 (Mainstream/Sidestream)

- Unique Plug & Play module for mainstream anesthetic gas monitoring
- The no moisture sampling line design suitable for all clinical applications
- A stable low flow of 50ml/min for all types of patients
