

# CARDIOTECH GT-8

Patient Monitor

USB Support

Nurse Call Function

Built-in Battery

**Storage:** SD Card Slot For Large Data Storage

**Display:** Full Touchscreen, 8.4" color TFT display, Large Font Display

# Exceptional Performance

The new generation CardioTech GT-8 patient monitor provides perfect transportation solution. The multi-functional all-in-one parameter module and new application platform greatly enhance the efficiency of full clinical parameter monitoring for patient transfer.

## Features

- Large font display
- VGA output and analog output
- Built-in rechargeable Li-ion battery
- Arrhythmia and S-T segment analysis
- 8.4" color TFT display with maximum 11 waveforms
- Pacemaker detection, electrosurgical interference proof
- USB and serial ports enables abundant future upgrades
- Defibrillation protection and defibrillation synchronization
- SD card slot enables memory extension for large data storage
- Complete and flexible mounting solution for different scenarios
- Nurse Call function and bi-directional communication with central station
- OxyCRG available to judge the respiration and circulation function for neonates
- Full touchscreen enables intuitive operation by clicking on the specific parameters or the waveform in real time, standard configuration includes the navigation knob
