

CARDIOTECH GT-70

Resting ECG Machine

USB Support

10"
Touchscreen

Built-in
Thermal Printer

Standard Parameters: Touchscreen, PDF, XML, MFER, BMP, JPG, and DICOM Data Storage

Optional Parameters: Spirometer, Thermal Printer

Adaptable to Various Environments

The CardioTech GT-70 is engineered to optimize workflow, enhance procedural efficiency, and improve diagnostic accuracy. Equipped with an alphanumeric keyboard and robust data security features, it supports a secure and user-friendly experience. The CardioTech GT-70 delivers advanced interpretation and a range of digital diagnostic modes, providing fast and accurate results to support confident clinical decision-making.

Features

- Smart AUTO workflow
- Various report formats
- Real-time interpretation
- External memory capacity
- Save user profiles & settings
- Long-term recording up to 30 min
- 3-USB ports for spirometer connection
- HDMI output for a larger screen display
- 30 min full disclosure with live data comparison mode
- Advanced spirometry test modes COPD, FVC, SVC, MVV
- Wireless LAN connectivity with HIPAA compliant transmission
- External USB data storage in PDF, XML, MFER, BMP, JPG, DICOM
