SPIROMETRY OPTION

The CP 150 ECG lets you perform two reimbursable diagnostic exams with one device. Help manage your COPD patients and maximize HEDIS scores with a spirometry solution that includes automatic interpretation and reversibility analysis. Plus, you can customize report formats and screen displays to meet your workflow needs.

- Perform FVC and pre- and post-BD testing with automatic interpretation and reversibility analysis.
- Customize report formats and screen displays to fit your needs and workflow.
- Ambient sensors can eliminate the need for the user to find and enter values for temperature, pressure and humidity.
- Manage patients with COPD to help you maximize **HEDIS** scores.
